DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 1 recites the limitation "the electromagnetic force" in line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Trombley et al.

Trombley et al teaches a rotating unit, 20, which rotates an object, 14, arranged vertically, (fig. 4), under polish, an abrasive tape, 92, which polishes the surface of an object, a roller tape head, 44A and 44B, which presses the abrasive tape against the surface of the object under polish, in a direction approximately right angled to the direction of the tension applied to the abrasive tape, (fig. 1), a tape supply unit, 40, which supplies the abrasive tape from the tape head, a tape take-up unit, 48, which takes-up the abrasive tape and a tape head pressuring unit which pressures the tape head using an electromagnetic force, (col. 3, lines 25-28).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 9 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Trombley et al in view of Blake et al.

Trombley et al. teaches all the limitations of the claims except for the abrasive tape being recovered below the object under polish and the object being a magnetic disk. Blake et al. teaches recovering the tape below the object being polished, (fig. 4), and the object being a magnetic disk, 101. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the invention of Trombley et al. with tape recovery means located under the object being polished, and for the object to be a magnetic disc, as taught by Blake, in order to enhance the tape feeding and movement of the system.

Allowable Subject Matter

Claims 3-5 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11-22,24 and 25 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reynen et al and Malagrino, Jr. et al. were cited to show other examples of polishers.

Art Unit: 3723

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shantese L. McDonald whose telephone number is (703) 308-8722. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on (703) 308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
